Mountain Weather Forecast

Yorkshire Dales National Park

Forecast valid from 06:00 on Saturday 16 Sep 2023 until 23:59 on Sunday 17 Sep 2023

Forecast Issued on Saturday 16 Sep 2023 at 01:07

Confidence: High for a cloudy day Saturday with rain and drizzle, likely persistent in places. Low confidence in any rain or thundery shower detail specific for Yorkshire Dales Sunday, but good confidence in the broad story of thundery showers spreading north across the UK. High confidence for a breezy day Monday with sunshine and showers. Confidence falls to Low again for the further rain and strong winds Tuesday and Wednesday.

Headline for Saturday 16 Sep 2023: Cloudy with outbreaks of drizzle, persistent and occasionally heavy across eastern hills.

Mountain weather hazards on Saturday 16 Sep 2023

Blizzards No Likelihood	**Heavy persistent snow** No Likelihood	**Storm force winds** No Likelihood

Forecast for Saturday 16 Sep 2023

Weather: Rather cloudy with summits generally obscured, especially in the east. The odd heavier shower cannot be ruled out early hours of the morning, but otherwise a mixture of drier intervals and occasional drizzle or light rain expected. Rain or drizzle likely persistent across some eastern hills.

Chance of cloud-free hill tops above 600m: 10% for much of the day, but 30% for far western hills.

Low Cloud and visibility: Widespread cloud obscuring hills above 500m, and some lower slopes above 300m in the east. Cloud perhaps a little patchier across western hills. Moderate visibility outside of cloud during drier intervals but falling to poor at times in any rain, particularly in any drizzle across eastern hills.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

A rather dull day, with persistent light rain and drizzle likely requiring waterproofs. Cloud will also be extensive leading to navigation difficulties. The brisk northeast to easterly breeze, will also bring a rather chilly feel on the tops.

Recent rainfall: measured at Malham: altitude 375m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
02:00 on Sat 16 Sep 2023	1.4mm	7.8mm	9.4mm

Forecast for Sunday 17 Sep 2023

Weather: Early cloud and drizzle gradually lifting off the hills and breaking into the afternoon. Perhaps the odd brighter or sunnier spell around the middle of the day. Heavy, potentially thundery, rain will spread north during the evening. Not all will see the rain, but where it does occur there is the potential for thundery and torrential downpours with hail, along with strong gusty winds. Feeling humid.

Maximum wind: Easterly 25mph gusting 30-40mph. Chance sudden gusts near 50mph around thundery showers.

Chance of cloud-free hill tops above 600m: 10%, increasing to 60% during the afternoon.

Low Cloud and visibility: Widespread cloud obscuring tops at 500m during the morning, with some patches as low as 300m. Cloud breaking and clearing at times during the afternoon, with the on hill cloud becoming patchier and mainly limited to tops above 700m, but returning to 500m or below during the evening. Good visibility away from cloud, but falling to poor in any heavy showers.

Temperature: **Valleys:** Plus 11 Celsius rising to Plus 19 Celsius
At 600m: Plus 9 Celsius rising to Plus 13 Celsius
Freezing level: Above summits.
